HATA-SAN

SUSHI & ROBATA

MENU

THE INGREDIENT AT THE CENTRE

Our Philosophy

Hata San’s cuisine is born from respect for the ingredient and a constant pursuit of excellence. Every product is selected for its origin, traceability, and sensory integrity, with the aim of expressing a contemporary Japanese cuisine guided by technique, precision, and quality.

Our approach combines Japanese rigour with a modern sensibility. We value each ingredient at its ideal moment through precise cutting, controlled maturation, targeted cooking, and carefully calibrated preparation, enhancing texture, balance, and aromatic depth.

Our bluefin tuna and its most prized cuts come from specialised international suppliers recognised for high quality standards and premium processing. The selection of cuts and management of maturation allow us to express their texture, richness, and complexity.

Rice is the heart of sushi. We use Japanese Wadachi-mai rice, appreciated in high-end restaurants and omakase experiences for its even grain, natural sweetness, and ability to retain gloss and balance after seasoning. Washing, cooking, and seasoning are performed according to controlled parameters.

For our meat preparations, we select Japanese A5 Wagyu from distinguished farms, including Ozaki production and other high-profile producers, chosen for genetics, controlled feeding, and marbling quality. The meat is air-freighted to preserve its freshness and character.

Our cuisine interprets tradition with respect, opening up to contemporary combinations whenever they serve the balance of the dish, while keeping the quality of the raw material at the centre.

THE CHEF'S JOURNEY

Tasting Menus
